**MACHINING  
COMPANY**

# Serving The **MINING / CEMENT** Industry

- *Trunnion Journal Refurbishment with or without Rotation*
- *Radial Thrust Face Machining*
- *Foundation Machining*
- *Hole Repair and Re-threading*
- *Tire Grinding*
- *Abrasive Wheel & Diamond Wire Sawing*
- *Head and Shell Flange Machining*
- *Spring Bore Repair and Re-boring*
- *Gear Tooth Repair*
- *Optical, Laser and Mechanical Measurement & Alignment*
- *Metalstitch® Cold Cast Iron Repair*
- *R-Stamp Certified Welding*

**T**hese examples represent only a few of the many types of field machining services that In-Place Machining Company offers our Mining and Cement manufacturing customers. Industry specific machinery such as crushers, pulverizers, ball mills, roller mills, rotary kilns, draglines, stacker-reclaimers, and other equipment used in Mining and Cement manufacturing operations are subject to very hard usage. When repairs require on-site measurement, alignment, or machining call In-Place Machining Company. Our expert machinists, welders, and alignment technicians are available 24/7/365. At IPM we pride ourselves on providing the highest quality, most responsive, and uniquely innovative service in the industry. In-Place Machining Company will work with you to minimize down-time and stretch your budget dollars. Next time a problem threatens your production, In-Place Machining Company can help you get back on-line, In Place... Any Place in the World.
