PRECISION

CNC MACHINING

IN-PLACE MACHINING COMPANY offers a wide range of high precision, quick turnaround CNC machining services. Our modern 100,000 sq. ft. machining and assembly facility includes a variety of horizontal and vertical spindle machine tools, CNC lathes and turning centers, and reciprocating and rotary surface grinders just to name a few. Our large investment in machines and tooling is helping satisfy growing demand for short run, highly engineered, precision components manufactured with little or no advance notice.
