MACHINING

In-Place or In-Shop

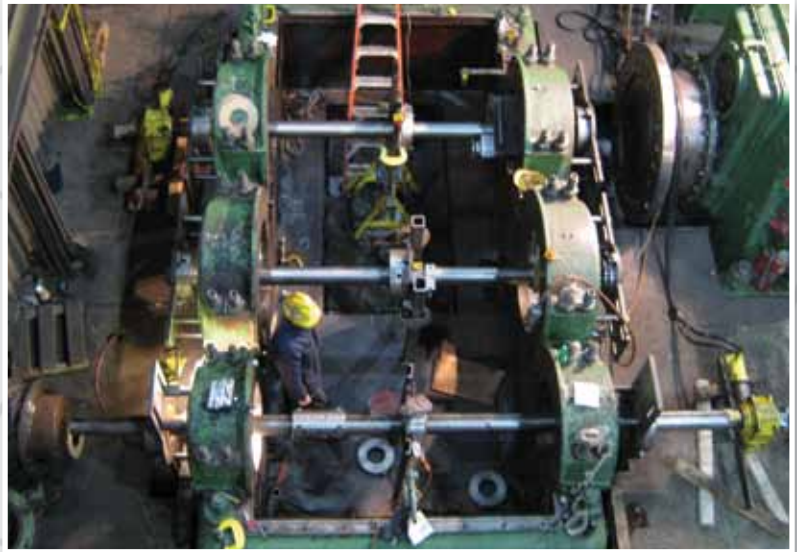

These example photos represent only a small fraction of the many different types of general machining services that In-Place Machining Company offers our customers. Whether you have a small repair or a multi-unit project, In-Place Machining Company has the experience you need. IPM provides specialized on-site machining services to a wide range of industrial, scientific and military customers throughout the world. Some call what we do in-situ machining or on-site machining, others refer to it as field machining, portable machining, or mobile machining. Of course we call it In-Place Machining. No matter what you call it one thing is clear, In-Place Machining Company provides Quality Machining In-Place... Any Place in the World.
