

IPM Sets Another Industry Record

17 ft. Planetary Machine is World's Largest

About In-Place Machining Company

In-Place Machining Company designs and develops specialized machine tool systems, and provides precision on-site machining and measurement services to a wide range of industries including Mining & Cement Mfg., Nuclear, Fossil, Hydro and Wind Power Generation, Steel & Aluminum Production, Marine, Pulp & Paper Mfg., Petro-chemical, Infrastructure, General Mfg., and Scientific and Military customers. With over 80 employees in 3 locations around the USA, and perhaps the largest inventory of dedicated on-site machining systems in the world, In-Place Machining Company is ready to serve you In-Place... Any Place In The World.

Refurbishes Bearing Journal Without Rotating the Mill

Milwaukee, WI - In-Place Machining Company, Inc. recently established another industry first by successfully refurbishing a 197" dia. ball mill journal without major disassembly and without

rotating the mill body. Once again IPM responded to industry demands for shorter outages and reduced maintenance spending with a unique on-site machining solution. The supersized system is In-Place Machining Company's latest addition to over 100 single point tooling, milling, grinding and honing systems based on planetary technology developed and perfected by the Company.

Even more noteworthy is the fact that IPM's highly skilled MSHA trained technicians completed the precision repair in a remarkably short 11 days. Completion of this

project further demonstrates that In-Place Machining Company is committed to providing leading on-site machining solutions to our mining, manufacturing and military customers worldwide.
