

In-Place Machining Company Acquires Exact Metrology

Exact Metrology Expands IPM's Offerings in Measurement & Alignment Technology

In-Place Machining Company, LLC ("IPM"), a globally recognized high acuity field machining company focused on providing highly technical, precision on-site machining, diamond wire cutting and measurement services to customers, announced today that it has acquired [Exact Metrology](#) as

Coordinate Measuring Machine (CMM) Probe

of July 2, 2021. As part of the In-Place Machining Company long term growth strategy, this acquisition will expand In-Place Machining Company's service offerings to include 3D scanning, Industrial CT scanning, metrology equipment sales, and software solutions.

This exciting addition provides [In-Place Machining Company](#) a strategic resource to bolster their growing measurement and alignment business. When talking about the benefits of acquiring Exact Metrology, President

3D Scanning Services

Long Range Scanning

and CEO of IPM, Dean Flint said, "In-Place Machining could not be more excited about the strategic potential resulting from the combination of these two great organizations. Both have been built on solving their customer's most challenging technical problems."

Commenting on this new partnership, Dean Solberg, Vice President of Metrology Sales/ Services, states "This opportunity to join forces with In-Place Machining Company is exactly what we were looking for. The ability to combine our metrology

expertise and IPM's expertise with on-site machining will push barriers in every industry. We look forward to combining our collective synergy as one team and taking on high-precision projects together, anywhere in the world."

With [Exact Metrology](#) holding offices throughout the Midwest in states including, Ohio, Illinois, and Wisconsin, In-Place Machining Company will expand their reach and provide the best possible service, sales, and technical support across the country.
