Machining and Measurement for Mining & Cement Customers.

These examples represent only a few of the many types of field machining services that In-Place Machining Company offers our Mining and Cement manufacturing customers. Industry specific machinery such as crushers, pulverizers, ball mills, roller mills, rotary kilns, draglines, stacker-reclaimers, and other equipment used in Mining and Cement manufacturing operations are subject to very hard usage. When repairs require on-site measurement, alignment, or machining call In-Place Machining Company. Our expert machinists, welders, and alignment technicians are available 24/7/365. At IPM we pride ourselves on providing the highest quality, most responsive, and uniquely innovative service in the industry. In-Place Machining Company will work with you to minimize down-time and stretch your budget dollars. Next time a problem threatens your production, In-Place Machining Company can help you get back on-line, **In Place... Any Place in the World.**
