

# IPM Field Machining Services Extended with Our New San Diego, CA Shop

## In-Place Machining Company is proud to announce the establishment of our newest location

In-Place Machining Company's [field machining](#) services, on-site measurement & alignment, and certified on-site welding are now supported by **our new San Diego, California location** to better support our customers.

*IPM Pacific Southwest Opens in San Diego, California*

### Expanding Field Machining at our Pacific Southwest Location—

As part of the long-term growth strategy for IPM, this location further expands our footprint in the United States. Situated just north of downtown San Diego, this location will allow IPM to serve existing customers locally and will expand our ability to locally serve new customers in a variety of industries throughout the Southwest.

IPM is gratified to announce the 11,000 sq. ft. shop will be managed by Matt Nehring, one of our own, who has 16 years of experience at IPM having served as a Design Engineer and Technical Representative. With the combination of local experts and the technician and machine tool

*On-Site Field Machining at a Hydro Power Plant*

resources provided by IPM, we are uniquely positioned to provide timely, high value, and professional services to your project.

**High Precision Field Machining from Start to Finish—** IPM is a world leader in precision [field machining](#) and measurement services. Our equipment can perform operations matching the precision and geometric tolerancing one is accustomed to in-shop machine environments. Our versatile, modular equipment can be configured to perform virtually all traditional machining and finishing operations such as turning, milling, drilling, boring, grinding, honing, and lapping.

Our field machining services are complemented by our [measurement services](#), which provide ultra-precise on-site measurement, inspection, and alignment services to our customers at their facilities nationwide and around the world. Our on-site measurement technology integrates

### *Gearbox Machining On-Site*

ultra-precise portable laser and laser tracker systems, optical, mechanical, and electronic measuring instrumentation with sophisticated computer software to provide coordinate measuring machine accuracy without the size and environmental constraints of conventional stationary CMM's.

### **Our extensive field machining services include—**

- Field Machining – Including Milling, Turning, Drilling, Boring, Tapping, and Reaming
- Diamond Wire Cutting
- Foundation Milling
- Bearing Journal Repair (with or without Shaft Rotation)
- Shaft Keyway Refurbishment
- Flange Facing
- Stud Removal
- Specialty Welding, Including R-Stamp Certified Repairs
- High Accuracy On-Site Laser & Optical Alignment & Measurement
- Metalstitch® Cold Cast Iron Repair
